## Say yes!

Give the gift of life as an organ donor.

Currently, more than 100,000 men, women, and children are waiting for an organ or tissue transplant in the United State. Approximately one-third of those people receive a life saving transplant and hope for a renewed life each year. This is due to the generosity of individuals who think of others in need at a time of their own personal grief. Despite this generosity, the need continues to grow. Each day 17 people die while waiting for a transplant and a new name is added to the transplant list every 8 minutes.

The first goal of Trails4Transplants is to bring awareness of the great need for organ, eye, and tissue donation, and to assist in educating people regarding the decision to be a donor. In 2023, more than 23,000 donors brought new life to recipients and their families! Secondly, we raise funds to promote awareness, support donor families and help those who have received the previous gift of life.

Give the gift of life and register to be a donor today at [Trails4Transplants.org](https://www.trails4transplants.org). You can also follow us on Facebook: <https://www.facebook.com/trails4transplants.org>
